

## ABSTRACT OF THE DISCLOSURE

The trailer hitch coupling kit is a kit for aiding a driver in coupling the tow ball of a towing vehicle and the socket of a trailer coupler, by enabling the driver to view the tow ball and a guidepost mounted onto the trailer drawbar while seated in the driver's seat of the towing vehicle. It includes a mirror assembly with two pivotally connected support legs, a pair of foot members that allow for attachment of the mirror assembly to the rear of a towing vehicle in three distinct manners, a trailer drawbar guidepost with a magnetic base and a carrying case.
